Re: *Final Site Inspection Report, Midland Army Airfield, Midland County, Texas.*
FUDS Project No. K06TX0199 CERCLIS ID# TX0000606419

Dear Mr. Niebuhr:

Thank you for your submittal of the above referenced document. As you are aware, the Federal Facilities Section of the Multimedia Planning and Permitting Division in Region 6 cooperates with states and the U.S. Army Corps of Engineers on the technical aspects of environmental projects on formerly used defense sites (FUDS). Additionally, the Site Assessment Team of the Superfund Division is responsible for determining whether the site should be further considered for inclusion on the National Priorities List (NPL) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, commonly known as Superfund).

The Site Assessment Team staff has completed review of the Federal Facilities Section's comments and they concur with our determination that the site inspection report contains sufficient information to conclude the site does warrant further consideration under Superfund. A copy of the *Superfund Site Strategy Recommendation (SSSR)* is enclosed. Please continue to work with the State of Texas and the Federal Facilities Section as you move forward on the recommended projects on this site.

Should you have questions, you may contact Gary Miller at (214) 665-8306, or Bret Kendrick at (214) 665-2240.

Sincerely,

A handwritten signature in black ink, appearing to read "G. Miller", is written over a horizontal line.

Gary Miller
Federal Facilities Section (6PD-F)

Sincerely,

A handwritten signature in black ink, appearing to read "Bret Kendrick", is written over a horizontal line.

Bret Kendrick
Site Assessment Team (6SF- TS)
